

SEWP VI OVERVIEW

NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

FAIR OPPORTUNITY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP Quote Request Tool (QRT) will automatically include the Contract Holders within a selected Group or based on a suggested source.

ABOUT LVSI CORPORATION

LVSI Corporation delivers secure, robust technology and systems integration solutions across IT, cybersecurity, wireless, electronic security, and audio/visual systems. With expertise spanning engineering, procurement, installation, commissioning, and maintenance, LVSI provides dependable solutions designed to reduce risk and deliver successful outcomes.

WHAT'S IN SCOPE FOR SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/ AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable our Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. SEWP is composed of three (3) scope categories detailed below. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and we will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category, the three categories are:

- Category A - ITC/AV Solutions
- Category B - Enterprise-Wide ITC/AV Service Solutions
- Category C - Mission-Based ITC/Av Service Solutions

SALES, ORDERING, AND POST-DELIVERY SUPPORT

For quotes for hardware, software, or services, customers should contact Ruben Fabrega, Bryan Thomas, or Alec Watson for pricing, product information, and purchasing assistance. These representatives can provide quotes and coordinate any additional information needed to support the ordering process.

For technical support, Alec Watson and Bryan Thomas will serve as the first line of support. If additional technical assistance is required, the matter will be escalated to the Director of Engineering, Tyler Dawson. For software support, the Director of Engineering will provide oversight and assistance as needed.

All products include a standard one-year warranty covering workmanship. If a product experiences a failure or breaks during the applicable warranty period, we will repair or otherwise address the issue in accordance with the warranty terms. Extended warranties and extended maintenance contracts are also available at an additional cost and can be discussed during the quoting process.

For any post-delivery issues, customers should contact Alec Watson and Bryan Thomas, who will coordinate the appropriate response and ensure that the issue is routed to the appropriate technical or service personnel.
